

BARAKA INVEST — SHARIAH COUNTRY REPORT

GCC · as of Sep 18, 2026 12:26

About this market

The **GCC** equity market is BARAKA Invest's pooled Gulf Country Group, spanning the exchanges of Saudi Arabia (Tadawul), Qatar, Kuwait and Dubai as a single investment universe — combining the region's deepest market with its faster-growing neighbours under one selection process. BARAKA Invest's GCC model selection currently spans 10 sectors and 40 companies. ADR-listed foreign companies trading in the US are covered in their home-country reports.

About BARAKA Invest

BARAKA Invest identifies the best-managed companies within each industry through a rigorous multi-factor evaluation. From this universe of industry leaders, BARAKA Invest applies its proprietary selection algorithm to choose model-portfolio constituents and set model weights across industries, sectors and countries. The methodology underlying company selection, portfolio construction and model-portfolio weighting constitutes proprietary intellectual property.

Shariah screening

Every selected company also passes a two-stage Shariah compliance screen aligned with AAOIFI standards: a business-activity screen excluding impermissible sectors, and financial-ratio screens applied to reported balance sheets. For this market, historical cycles shown in this report are filtered using compliance as currently assessed; point-in-time screening applies from each company's entry date and is re-affirmed quarterly — a company that loses compliance is removed from the selection. Specific thresholds and screening mechanics are proprietary.

Universe coverage — companies the selection process is applied to

In GCC, BARAKA Invest's selection process is applied to a universe of **638 classified companies** across 11 sectors; 40 companies are currently selected.

Sector	Universe companies	Currently selected

Current selection & performance — actual weights

Key dates: strategy inclusion May '26 (first selection, from Q1-2026 data) · latest quarterly review as of Sep 18, 2026 12:26 · each company's performance is measured from its own inclusion date · the equal-amount current cycle runs from the May-2026 window.

Total return	BARAKA Invest selection	Tadawul All-Share
Selections since their own entry dates*	+3.7%	—
Live selection — model (May '26 → date, USD)	+5.3%	—

*Benchmark figures on the since-selection row are measured over the same spans as the selections — each index leg runs from that name's own entry date, blended by model weight. The live-selection row shows the model selection, marked to market (USD-normalized) since it opened. A dash — in a benchmark cell, and an absent benchmark line in the report's charts, mean the exchange's index series is incomplete for part of the measured span at our data vendor; the benchmark is shown wherever its series is complete (as in the completed-cycles chart within the report) and resumes automatically once the missing print publishes — it is never estimated.

Each selected company contributes to the selection line from its own entry date and is modeled as cash before entry; index lines span the full period.

Top selections

Company	Ticker	Sector	Weight (% of model portfolio)	Selected	Since selection
Specialities Group Holdings Company	SPEC.KW	Industrials	2.88%	May '26	+13.7%

Performance Summary: GCC

	BARAKA Invest selection	Tadawul All-Share
Track record (compounded, to date) 6 completed cycles + current cycle · ≈ +1% annualized	+1.6%	-10.7%

The BARAKA Invest strategy compounds the algorithm's quarterly market-wide selections across the 6 completed cycles plus the current cycle, measured to the latest price — versus the same benchmarks over the same span.

Selection record — 6 completed cycles + current (equal amounts)

This record gives every selected company an equal amount of money, so it measures which companies we choose; the 'since inclusion' figures above use actual model weights and show what the model portfolio earned. The difference between the two views reflects the contribution of model weighting. Each quarter the algorithm re-selects the best-managed names across every industry in the market; the chart compounds those quarterly recommendations to the latest price versus the benchmarks.

Cycle	Selected (count · sectors)	Selection	Tadawul All-Sha
2025-02	10 companies · 6 sectors	+4.3%	+1.3%

General Notes

Performance reflects total return including dividends. "Since selection" is measured from each company's own selection date (marked on its chart); strategy inception was February 2026 and the latest quarterly review was May 2026. Where the algorithm selects no qualifying name in a given quarter, that quarter is modeled as cash (flat). "Weight" is the company's model weight as a percentage of the total diversified model portfolio, assigned by BARAKA Invest's systematic allocation methodology (specific weighting mechanics and parameters are proprietary). The track record compounds the quarterly selection returns across the 6 completed cycles and the current cycle.

No offer, no solicitation, no advice

This report is provided for information only. It does not constitute an offer to sell or a solicitation of an offer to buy any security, nor investment, legal, accounting, tax or Shariah advice. Nothing in this report should be construed as personalized investment advice or a recommendation tailored to any particular investor; nothing herein takes into account the specific objectives, financial situation or needs of any recipient.

Backtested & past performance

Performance shown for periods prior to February 2026 is hypothetical and backtested. It reflects the application of the current investment methodology to historical market data and does not represent actual trading or client accounts. Backtested results are prepared with the benefit of hindsight and have inherent limitations. They do not reflect the impact of actual investment decision-making, market liquidity, transaction costs, taxes, slippage, or investor behavior, except where expressly stated. Actual investment results may differ materially. Performance from February 2026 onward reflects live model (paper) tracking of the published selections under the BARAKA Invest methodology. Unless otherwise indicated, model portfolios are rebalanced quarterly; track-record cycles are presented on an equal-weighted basis, and current-selection figures use actual model weights, as labelled in each section. Returns include reinvested dividends where total-return data is available — all United States figures and international track-record cycles; live-selection (model) returns for international markets and pooled GCC figures are price-based and do not include dividends. All returns exclude taxes, advisory fees, and investor-specific transaction costs unless otherwise stated. Past performance, whether actual or simulated, is not a reliable indicator of future results. Losses, including loss of principal, are possible.

Data & no warranty

Information herein is obtained from sources believed reliable, including regulatory filings and third-party market data, but is provided "as is"; BARAKA Invest does not warrant its accuracy, completeness or timeliness and accepts no liability for any loss arising from its use. Third-party information has not been independently verified by BARAKA Invest. All data are as of the date shown and subject to change without notice; BARAKA Invest assumes no obligation to update this report.

Update cycle

This report is ordinarily refreshed on a quarterly basis following BARAKA Invest's scheduled selection review process. BARAKA Invest may, at its sole discretion, issue interim updates when it believes that material developments have significantly affected the analysis, ratings, or standing of one or more covered companies. The most recent version of this report supersedes all prior versions. This publication schedule reflects BARAKA Invest's current practice only and does not create any obligation to update, revise, or continue publishing this report or any portion thereof at any particular time. The withdrawal of coverage or the absence of an updated report should not be interpreted as a change in BARAKA Invest's opinion or outlook regarding any issuer or security.

Distribution & regulatory status

This report is not directed at, and is not intended for distribution to or use by, any person in any jurisdiction where such distribution would be contrary to law or regulation, or would require BARAKA Invest to be licensed, registered, or otherwise authorized under applicable law. BARAKA Invest is not currently licensed or authorized by a financial regulatory authority to provide regulated investment services. This report is provided solely for informational purposes and is not intended to constitute a regulated financial promotion in any jurisdiction. Persons receiving this report are responsible for ensuring that its receipt and use comply with applicable laws and regulations.

Conflicts of interest

BARAKA Invest, its principals, employees, or affiliates may hold long or short positions in securities discussed in this report, including through model portfolios described herein, and may buy or sell such securities without prior notice.

Shariah screening status

Shariah screening applies criteria aligned with AAOIFI standards as interpreted by BARAKA Invest. It does not constitute a fatwa or certification by a Shariah Supervisory Board, and compliance status may change as company financials evolve. Investors should consult their own Shariah advisors as to the permissibility of any investment.
